

Designed to save Veterinary Radiation Oncologists' time

Like Varian, your veterinary practice is built around treating your patients. However, a substantial amount of Veterinary Radiation Oncologists' time is spent creating treatment plans rather than caring for patients. Varian Dosimetry Services enable veterinary radiation oncologists to spend more time with patients by outsourcing dosimetry needs while still overseeing the quality and approval of every plan.

"A win win! Quality treatment plans and fast treatment times, result in less treatment planning time, allowing me to spend more time with my patients, giving them the best possible care."

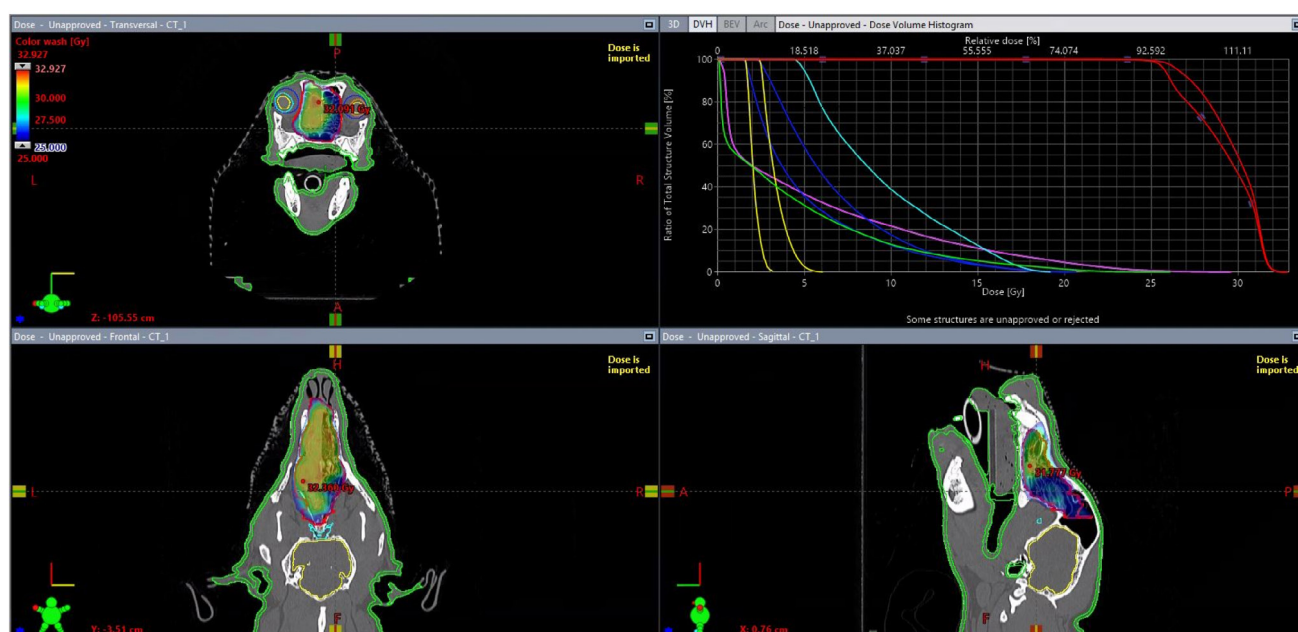

— David Ruslander, DVM, DACVIM, DACVR in Cary, NC

Transforming cancer care together

Varian's Veterinary Dosimetry Services are specialized for our veterinary customers to leverage Varian's technology and dosimetry experience, empowering you to meet your patients' treatment needs. Our veterinary trained

certified medical dosimetrists strive to meet the dose and planning directive prescribed by your hospital's radiation oncologist in a centralized and easy-to-use workflow using Varian's AI contouring in a cloud-hosted solution.

Treatment Plan on a dog using VMAT technique.

For more information contact local Varian sales or email VetOnInfo@Varian.com.

Important Safety Information

Radiation therapy is not appropriate for all cancers. For more information, please visit www.varian.com/safety.

For veterinary patients, including but not limited to dogs and cats, the user should consider the specific anatomy and other unique characteristics of the patient when evaluating and implementing a veterinary treatment. During treatment, the anesthetic protocol and intra-anesthesia monitoring of the patient should conform to the standards of practice in the veterinary community.
