![CareCredit - Making care possible...today.]

Scanning makes it simple to apply—for everyone.

A QR code lets people apply for the CareCredit credit card easily using their own smartphone—saving your staff time and effort.

QR Codes deliver real results:*

45% more applications

27% more revenue

7% larger average purchase

Put financing directly in your patient or client's hands by letting them scan and apply for credit.

1 **Save time and effort.** Eliminate the need to collect personal information or keep signed applications.

2 **Get care immediately.** If approved, the patient or client can use their CareCredit credit card to transact the same day.

3 **Unique for your practice.** Reports are available to help you identify patients or clients who scanned and applied for financing, so you can reach out and follow up.

*Results from 393 optical locations (June - August 2019) that actively introduced CareCredit, implemented apply options using QR codes, and accepted the CareCredit credit card as payment. Results may vary by location.
